

**Dr. Daniel Thoma – University of Zurich – Switzerland**

Dr. Daniel Thoma is a Head of Academic Unit at the Clinic for Fixed and Removable Prosthodontics and Dental Material Sciences, University of Zurich, Switzerland. He graduated in 2000 at the University of Basel, Switzerland and was trained in implant dentistry and prosthodontics at the Clinic for Fixed and Removable Prosthodontics and Dental Material Sciences, University of Zurich, Switzerland. Dr. Thoma was the recipient of an ITI scholarship and spent 1 year at the Department of Periodontics, University of Texas, Health Science Center, San Antonio, USA. Between 2008 and 2012, he was a full-time Senior Teaching and Research Assistant at the Clinic for Fixed and Removable Prosthodontics and Dental Material Science at the University of Zurich, Switzerland. In 2013, he got his venia legendi (Privatdozent) at the University of Zurich and since then serves as a Head of Academic Unit at the Clinic for Fixed and Removable Prosthodontics and Dental Material Science at the University of Zurich, Switzerland. His focus is on the comprehensive treatment of complex, partially edentulous patients applying all available options of reconstructive dentistry including dental implants. His main scientific interest is related to hard and soft tissue regeneration with and without the addition of biologic mediators. He has published numerous scientific and clinical articles in these fields. Dr. Thoma is a Fellow of the International Team of Implantology (ITI) and member of Osteology Expert Council.

14<sup>th</sup> Annual Senior Residents' Day 8:00 a.m. – 12:00 p.m.  
Nova Southeastern University/University of Florida

You are invited to attend and support NSU/UF Senior Residents as they present their case studies. An interesting and informative afternoon.

An FAP tradition!

**No registration fee and earn up to 4 CEUs!**

**Modern soft tissue management with applying autogenous transplants and soft tissue substitutes (Hands-On Workshop) – Dr. Daniel Thoma**

**4 CEUs**

**LIMITED TO 30 PARTICIPANTS**

Workshop Learning Objectives:

- To recognize clinical indications for soft tissue grafting procedures
- To understand the role of autogenous tissue
- To understand advantages and disadvantages of soft tissue substitute
- To understand clinical indications for soft tissue substitutes
- To be able to choose the ideal flap design for the use of soft tissue substitute
- To understand the ideal dimension of a soft tissue substitute
- To be able to perform a clinical procedure for soft tissue volume gain at pontic sites and implant sites

**FAP Welcome Reception • 5:00pm - 6:30pm**  
EXHIBIT AREA - Unwind and relax with your peers!

## Saturday, February 9

### Tentative Corporate Forums:

Visit FAP website for Corporate Forum listings

1 CEU • 8:00am-8:45am

### Designing a Connective Tissue Graft Alternative from Scratch: Perspective from Prototype to Three Year Clinical Follow-Up – Dr. Daniel Thoma

- Abstract or Learning Objectives – Recent clinical data underline the importance of a sufficient mucosal thickness to provide healthy peri-implant tissues and favorable esthetics. A newly developed volume-stable collagen matrix provides similar outcomes with respect to soft tissue volume, but is associated with less morbidity and complications than autogenous grafts, thereby offering significant benefits for patients and clinicians.
