

**Presidential Message**  
**Dr. Oscar Morejon**

I am honored to assume the Presidency of the Florida Association of Periodontists. I would like to thank Dr. Greg Oxford for nominating me to go up the ladder of FAP leadership. When I think of all the past presidents that have served before me, I know that I truly have big shoes to fill.

The Florida Association of Periodontists has a long history of being active within state and national issues involving the laws and rules of dentistry and the overall well-being of patients. This has become especially important recently as the Florida Board of Dentistry has lowered the standard of care with some of their rule changes. If safety for our patients is paramount, these changes open the door to abuse.

Thanks to the hard work of Dr. Mark Abdoney (2015-2016 FAP President), we have a political action committee in place that can give us a greater influence in placing a qualified dentist on the Florida Board of Dentistry. A dentist who will ensure the safe practice of dentists and dental hygienists in their service to the people of Florida.

In the coming year, the FAP Executive Council will stay vigilant to the changing political landscape, and continue to advocate for our specialty within our state. You truly have a strong and hardworking team representing you, and we all take this responsibility seriously.

In the coming year, we will continue to provide our membership excellent continuing education at an attractive venue that allows members to interact and share ideas and techniques. I always leave our meetings with pearls for my practice at these meetings.

We are fortunate that we have two excellent graduate periodontal programs in Florida and we will continue to develop the relationship between those programs and FAP membership. I would like to congratulate the senior residents from Nova

# 2017 Summer Meeting

August 11-12, 2017

Loews Portofino Bay Hotel  
at Universal Orlando®

*Shaun Fix, EMT-P: Emergency Airway  
Management for Dental Professionals*

*Dr. Colin Richman: Minimizing Esthetic  
and Functional Risk through Pre-Orthodontic  
Periodontal Augmentation - POPA*

Sponsored By: Geistlich Pharma

**MEETING REGISTRATION FORM ON PAGE 9**

## Important Dates

President's Message: continued from page 1

May 19, 2017 Florida Board of Dentistry Meeting  
(Rule Hearing begins at 12pm)  
Doubletree by Hilton Orlando Airport

June 22-23, 2017 Southern Academy of Periodontology  
Annual Meeting  
Ritz Carlton, Sarasota, FL

**August 11-12, 2017 FAP Summer Meeting  
Orlando – Loews Portofino Bay Resort at  
Universal Orlando™**

August 25, 2017 Florida Board of Dentistry  
Sheraton Tampa East

Sept. 9-12, 2017 AAP 103<sup>rd</sup> Annual Meeting  
Boston, MA

November 17, 2017 Florida Board of Dentistry Meeting  
Embassy Suites by Hilton

Southeastern University and The University of Florida for their excellent presentations during the FAP's 12th Annual Senior Residents Day at the FAP Winter Meeting. Thank you for your hard work in preparing the programs and for selecting an interesting slate of topics.

The next FAP meeting will be August 11-12, 2017 at The Loews Portofino Bay Hotel at Universal Resort. I want to encourage you to make your reservations early – the hotel sold out last summer. The Friday program will be the hands-on airway management course for periodontists and their dental team members. This course received excellent reviews at the 2015 FAP Summer Meeting. Dr. Colin Richmond will speak all day on Saturday and I look forward to his outstanding lecture on POPA (Pre-Orthodontic Periodontal Augmentation).

Thank you and I will see you in August!

Oscar Morejon, DMD

## Perio PAC Update

Since our meeting this past February, the PAC has received contributions totaling \$10,253.00 bringing the overall total to \$23,000.00. I am encouraged by the support the PerioPAC has received. To date, 36 members have contributed to the PAC; 16 of which contributed at the \$1000.00 Platinum Level. This is much improved over the participation we had coming into the winter meeting, but we still have a long way to go.

I want to extend my deepest thanks and gratitude to those who have contributed; as well as those members who have been so helpful in building this movement. To those who have yet to give, please do so as soon as possible. As I said at the February FAP Business Meeting, we want 100% participation from our membership in PerioPAC. For those who see the value in what we are doing and have contributed, please contact your colleagues and friends in our association and encourage them to give. We have much work to do championing the causes of our membership and specialty and having 100% participation at some level is vitally important.

Please feel free to call or email me if you have any questions.

Sincerely,  
Mark A. Abdoney  
mark@abdoneyperiodontics.com  
813-873-2447

p.s. Ready to donate? Please see the form on the next page.

# 2017 Winter Meeting Highlights

The UF/NSU Senior Residents' Day presentations were outstanding and well-received; seven residents presented on a wide range of topics. **Dr. Mark Forrest** was recognized at the FAP Business Meeting Luncheon for his hard work and dedication to organizing the FAP Senior Residents' Day. This was the 12<sup>th</sup> year of bringing this program to FAP membership.

On Saturday, Dr. Brody Hildebrand lectured on Implant Interactions with Orthodontics. Along with FAP members, six orthodontists were present for this presentation.

Dr. Robert Churney bid everyone farewell as FAP President and introduced **Dr. Oscar Morejon**, 2017-2018 FAP President. The rest of the 2017-2018 FAP Officers are: **Dr. Patrick Johnson**, President Elect, **Dr. Rodrigo Romano**, Secretary-Treasurer, **Dr. Jessica Stilley**, 2<sup>nd</sup> Member at Large, **Dr. Walt Colon**, 1<sup>st</sup> Member at Large, and **Dr. Robert Churney**, Immediate Past President.

Thank you to all who came out for this great meeting and looking forward to seeing you in August!

Welcome new FAP Members (l-r):  
Drs. Liana Basceanu-Sarbu,  
Antoine Clarke, and Irene  
Marron-Tarrazzi

Congratulations to Dr. Mark  
Forrest for his dedication to the  
UF/NSU Senior Residents Day

## By the numbers:

**87** dentists

(periodontists, orthodontist, gp)'

**1** hygienist

**24** residents

**24** exhibitors

The FAP Executive  
Council met on  
Friday morning.

## Volunteers Needed for FAP Sounding Board

The FAP is seeking a few members to serve on the FAP Sounding Board. The Sounding Board will have at least one of its members listen in on each Board of Dentistry Anesthesia Committee conference call. This member will report back to the FAP Executive Council (EC). The Sounding Board will also be asked to convene and work with the FAP EC when any anesthesia issues arise. If you are interested, please contact the FAP office at 352-232-6800 or [fap@tampabay.rr.com](mailto:fap@tampabay.rr.com).

## FAP Member Receives Award

Congratulations to **Dr. Irene Marron-Tarrazzi**, recipient of the Lucy Hobbs Project's Woman to Watch Award; she became the youngest elected vice president of the ADA. Dr. Marron-Tarrazzi seeks to inspire women to pursue a career in dentistry and encourage them to run for leadership roles at the national level. Dr. Marron-Tarrazzi will accept her award at the 5th Annual Celebration in Philadelphia in April.

*The Lucy Hobbs Project empowers women in dentistry to drive change and deliver success through networking, innovation and giving back. The Lucy Hobbs Project to honors Lucy Hobbs, the first woman in dentistry. The Lucy Hobbs Project is open to women and men dentists, dental assistants, hygienists, office managers, sales representatives and consumers.*

# Highlights of the February 2017 Board of Trustees Meeting

The AAP Board of Trustees met February 10-12, 2017, in St. Petersburg, Florida.

The Board approved a new icon that reflects the strategic direction of the Academy for 2017. The icon will be tweaked annually as necessary based on evolving priorities. Board actions have been organized below to reflect the foundational elements represented in the icon: Science, Membership, Awareness, and Organizational Viability.

## SCIENCE

### The World Workshop on the Classification of Periodontal and Peri-Implant Diseases and Conditions (WWDC)

This invitational state-of-the-science workshop will be held in Chicago in November 2017. The Workshop, a joint endeavor between the AAP and the European Federation of Periodontology, will convene experts from around the world to summarize the existing literature, update the current disease classification, evaluate clinical applications, and identify research priorities.

### Best Evidence Consensus on CBCT and Lasers (BEC)

The BEC is a new consensus model developed by the AAP to address questions of clinical importance for which there is insufficient evidence to develop a definitive answer. The first topics addressed using this format were cone beam computed tomography (CBCT) and lasers. Experts in each area met in February to develop consensus statements on five clinical questions and make recommendations for future research. The BEC proceedings will be published in the *Journal of Periodontology* in mid-2017.

### New Scientific Publishing Partner

The AAP recently evaluated its publishing enterprise to determine whether it should partner with a commercial publisher to produce and distribute the *Journal of Periodontology* (JOP) and *Clinical Advances in Periodontics* (CAP). Following intensive analysis, the **Task Force to Evaluate Commercial Publishing Partners** recommended outsourcing in 2018, due to the economies of scale, potential for an updated online platform, and significant financial incentives a commercial publisher can provide.

## MEMBERSHIP

### Match Program

The Board voted to support the **Education Committee's** recommendation to join the National Matching Services (NMS) program to connect prospective postdoctoral periodontal students with mutually interested residency programs for the 2017 recruitment period. The AAP joins seven other dental associations as a sponsor.

### Annual Meeting Innovation

The **Task Force on Annual Meeting Innovation** considered elements that would encourage attendance and promote relevance, including innovations in content and delivery. Recommendations will be shared with the Continuing Education Oversight Committee as it plans the 2018 Annual Meeting.

## Member Engagement

The **Membership Advisory Committee** (MAC) presented a workplan that addressed three areas: member engagement and communications; member value; and membership growth. In addition, the Board reviewed recommendations from the **New Periodontist Subcommittee**, which is charged with providing counsel on the needs of new periodontists. The Board approved both plans and the groups will begin implementing strategies immediately.

### PerioHub Clinical Online Community

In May, the Board approved, in concept, the establishment of a discussion group on AAP Connect limited to members who have been trained or are currently enrolled in a U.S.- or Canadian-accredited periodontal program. This new community provides a digital space for those who have specialized in periodontics to discuss clinical and scientific issues related to the specialty. To reflect this spirit, the **Task Force on AAP Connect Community Support** suggested the community be called

“PerioHub.” The Open Forum will remain as AAP’s all-member community, where the entire membership can discuss practice management issues, equipment choices, and other topics. PerioHub is intended to supplement, not replace, the Open Forum. The advent of this dedicated online group is in response to member requests for a space to share clinical cases and engage in robust scientific dialogue relevant to periodontal practice. With the establishment of this new community, the AAP provides multiple avenues for member dialogue, practice support, and clinical advancement. Look for information soon announcing the launch of PerioHub.

## AWARENESS

### Consumer Awareness

The Board approved the 2017 plan for the Love the Gums You’re With campaign for launch this spring. This national effort is designed to increase public awareness of periodontal disease and periodontists using a creative mix of public relations strategies. In 2016, the AAP reached over 71 million people.

## VIABILITY

### Governance

The Board charged the **Election Oversight Committee** to evaluate the district nominating committee process and make recommendations that would provide for greater participation in AAP elections.

### Certification in Dental Implant Surgery

The Board approved that the American Board of Periodontology pursue an optimal pathway for periodontists to become certified in dental implant surgery. More information on this process will be shared with members as it becomes available.

*Please contact your AAP Trustees,  
Dr. Robert Churney, dc@churneyperio.com or  
Dr. John Russo, russoimplant@comcast.net with concerns or questions.*

# **IMPORTANT** From the Florida Dental Association **IMPORTANT**

## **Action Requested: BOD to Hold Public Hearing on Proposed Hygiene Rules**

The Florida Dental Association (FDA), along with the Florida Association of Periodontists (FAP), the Academy of General Dentistry (AGD) and several individual licensed dentists, filed a request for a public hearing with the Florida Board of Dentistry (BOD) on the proposed changes to the hygiene rules, which would move scaling and root planing and the placing of medicaments to general supervision (a dentist does not have to be in the office) from indirect supervision (a dentist must be in the office). We received notice from the BOD that the public hearing on the hygiene rules will be held May 19th in Orlando at the DoubleTree by Hilton Orlando Airport.

So, what is the next step? We need all FDA members to send in written comments to the BOD stating why we oppose these changes. For your convenience, a template letter can be obtained by emailing the Florida Association of Periodontists at [fap@tampbay.rr.com](mailto:fap@tampbay.rr.com).

However, please include specific instances on how these changes will impact your practice, jeopardize the safety of the public, and scientific evidence on why these procedures should not be under general supervision. The proponents of these rule changes have stated that they have never heard of any adverse reactions occurring when these procedures are performed. Thus, information on patients who have been harmed by these procedures will be critical to our argument. For example, a hygienist can perform these procedures today as long as a dentist is in the office. So, if an adverse reaction happens, the dentist is available and is the one qualified to jump in when bleeding, etc. occurs.

Please send letters to:

Dr. Joseph Thomas, Chair, Florida Board of Dentistry  
Department of Health  
Board of Dentistry  
4052 Bald Cypress Way Bin C-08  
Tallahassee, FL 32399-3258

Or you can email the letter to  
Dr. Thomas' attention at:  
[Jennifer.wenhold@flhealth.gov](mailto:Jennifer.wenhold@flhealth.gov)

*Thank you for your help! If you have any questions, please contact Director of Third Party Payer and Professional Affairs Casey Stoutamire, Esq. at [cstoutamire@floridadental.org](mailto:cstoutamire@floridadental.org) or 850.350.7202. Please copy Casey on your letter.*

## **Seven Tips for Business-Appropriate Texting**

Most of us text. Texting is increasingly being used for business purposes, but if not done appropriately it can cause misunderstandings and reflect poorly on the person sending the text and their company or organization.

*Here are seven important etiquette suggestions for business texting, adapted from Entrepreneur.com.*

**Consider your audience:** Business texting is an entirely different animal than personal texting. Whenever you send a business text, present yourself in a professional manner and make sure that it is tailored to your specific audience.

**Communicate clearly:** By nature, texting is different than sending an email. Since texts need to be brief, they sometimes are more susceptible to being misunderstood, which can adversely affect what you're trying to accomplish. Make sure that your texts are clear and not open to the reader's interpretation.

**Respond promptly:** Texting is meant to be a quick, easy way of communicating. So, when you receive texts, respond as soon as possible; not doing so often is viewed as a sign of inefficiency and/or lack of caring.

**Use symbols and emoji only when necessary:** Casual symbols such as emoji can help to lighten the mood of your text and create

a friendly bond. But in general, they're much more suitable for non-business texts. If you use them in business communications, don't overdo it.

**Don't be long winded:** Business texts walk a fine line between being brief but clearly conveying information. Pay attention to the length of the texts you are receiving from people with whom you are communicating. If their texts are very short, this might indicate that they would like yours to be very brief, too.

**Be patient:** Sometimes, people get frustrated when they send texts about urgent, important matters but don't hear back right away. Realize that the person you are texting might not be available and that most likely, he or she will get back to you as soon as possible. So, it's generally not advisable to keep sending texts if you don't hear back from the person; this often is viewed as rude and overbearing.

**Know when to end the conversation:** Be sensitive to the flow when texting back and forth with someone. You need to reach a mutually comfortable stopping point. Don't badger the recipient for more texts if you sense that their communications seem to be winding down.

# 2017 Summer Meeting

August 11-12, 2017 • Loews Portofino Bay Hotel at Universal Orlando®

**Friday, August 11, 2017**

12:00 p.m. – 5:00 p.m.

Shaun Fix, EMT-P and President,  
Emergency Medical Consultants, Inc.  
4.5 CEUs

## Emergency Airway Management for Dental Professionals

This program meets the Florida standard by discussing monitoring and recognition of airway and respiratory emergencies in the dental setting then introducing and utilizing standard airway equipment. Through the use of video, slides, case reviews, and hands-on skills labs, participants will review the anatomy of the airway and the physiology of adequate ventilations followed by skills labs in basic and advanced procedures including:

- Initial airway skills such as effective BVM, oral and nasal airways, and perilaryngeal airways will be introduced, reviewed and practiced as the first choice as well as a “rescue” or failed airway.
- Advanced skills such as basic intubation, difficult intubation, unique anatomy, unique positioning, and variations to the “normal intubation” will be practiced.
- Needle and surgical cricothyrotomies will be practiced on both manikins and animal models.

This skills-focused day will leave you with many “tricks of the trade”, feeling more confident with the airway anatomy, providing care and recognizing patients who may or may not be candidates for various procedures.

This program is specifically designed for patients in the dental practice setting utilizing equipment common and available to the dental professional 4.5 hours.

### Course Fees:

\$475.00 per dentist. \$225.00 per staff member with paid dentist. Staff is defined as non-periodontist, non-dentist.

**It is imperative that you show up  
on time for this course.**

*All dentists who hold an active sedation permit of any level must complete four (4) hours of continuing education in airway management and four (4) hours of continuing education in medical emergencies, every four (4) years from the last date the dentist took the continuing education course. The four (4) hours in airway management must include two hours didactic training in providing dentistry on sedated patients with compromised airways and two hours must include hands-on training in airway management of sedated patients. The continuing education must be taken through a board approved continuing education provider. The continuing education required by this subsection will take effect on March 1, 2014. The continuing education required by this subsection may be included in the thirty (30) hours required by Section 466.0135, F.S.*

**Meets the needs of all Dentists who hold an active  
sedation permit of any level!**

**Saturday, August 12, 2017**

9:00 a.m. – 4:00 p.m. – 5 CEUs

Dr. Colin Richman -

*Sponsored by Geistlich Pharma*

## Minimizing Esthetic and Functional Risk through Pre Orthodontic Periodontal Augmentation - POPA

These innovative dental procedures, combining regenerative periodontal therapy with orthodontic treatment, enable the dentist to minimize potential iatrogenic risk factors associated with orthodontic therapy. Favorably positioned teeth, plus an enhanced muco-gingival complex, facilitates ideal and predictable esthetics and function.

### Course outline will include:

1. Treatment of existing recession and periodontitis lesions, as well as enhancement of thin biotypes. This minimizes the risk of iatrogenic gingival recession associated with orthodontic treatment.
2. Greater post treatment orthodontic stability.
3. Less apical root resorption.
4. Predictable and definitive periodontal and muco-gingival treatment.
5. Accelerated orthodontic treatment, usually completed in 6-9 months.
6. More stable and ideal tooth alignment.
7. Less need for orthognathic treatment or extractions

### Learning objectives include:

1. Why: Recession/Impactions/GBR/Sleep Disorders?
2. Background and concepts of POPA
3. Limitations and complications of orthodontic treatment.
4. Minimizing risk: gingival recession, root resorption; extended orthodontic treatment time.
5. Logistics of executing multi-disciplinary treatment.
6. Representative clinical cases.
7. Evidence in support of POPA

### Interactive Hands-on Treatment Planning

1. Meeting attendees, working together, will be provided with comprehensive records of a patient presenting with complex dental problems.
2. As a team, each group will establish a treatment plan using varying scenarios (e.g. no orthodontics, or limited finances, etc.).
3. A spokesperson will then discuss their hypothetical treatment plan with the entire group.
4. Using information reviewed in the morning session, Dr. Richman will present the actual treatment provided for this patient.
5. These sessions provoke much thought and discussion.
6. The role of the hygienist in facilitating patient acceptance of comprehensive care will be addressed, as well as his/her role in the Interdisciplinary Dental Team striving to achieve comprehensive esthetic and functional dental care.

## 2017 Summer Meeting Speaker Biographies

### DR. COLIN RICHMAN

Dr. Colin Richman was born in South Africa; graduated from the University of Witwatersrand, and completed his residency in Periodontics at the University of Connecticut. He held a faculty position at Emory University School of Dentistry, until the school closed. He then entered private practice, limited to Periodontics and Implant Dentistry for the past 30 years.

Dr. Richman is an assistant professor in the Department of Periodontics at the Medical College of Georgia. He is very actively involved in Pre Orthodontic Periodontal Augmentation (POPA), and has been described as a pioneer in the emerging technology of POPA.

Dr. Richman has delivered more than 350 continuing education programs both in the US and abroad. He is the Director of the Seattle Study Club of Atlanta; belongs to numerous dental organizations including AO. He is a Diplomate of the American Board of Periodontology, and an Honorable Fellow of the Georgia Dental Association.

Dr. Richman is married to Maureen Richman, and has two sons, Steven who is a practicing Tax Attorney in Atlanta, and Peter, also a tax attorney, practicing with one of the big four accounting firms in Washington DC.

### SHAUN FIX

Shaun has been practicing and teaching in the hospital and pre-hospital field since 1983. He is the president of Emergency Medical Consultants, Inc. and a company officer in charge of EMS for Boca Raton Fire Rescue Services in the Palm Beach area of South Florida. This team has been presenting Management of Office Emergencies for Dental Professionals since the 90's and along with Dental Specialty ACLS courses, helped present the original curriculum for the Dental Airway Course with members of the FSOMS board. Shaun has presented programs at state, national and international conferences and has appeared on FETN, Pulse, 24-7 EMS, Medic Monthly, and Emergency Medical Update Videos. A frequent lecturer, author and consultant, Shaun and his group are best known for keeping their programs upbeat and relevant while bringing "the reality of emergency medicine" to the classroom setting and providing onsite relevant training based on the providers specific needs.
